

## Energy Saving Tips:

- ✚ Lower your thermostat at night before you go to bed and raise it again in the morning
- ✚ Turn off lights and other appliances when not in use
- ✚ Turn down the thermostat on your hot water heater
- ✚ Use caulking and weather stripping to seal openings around doors, windows and kitchen and dryer vents
- ✚ If you feel a draft, cold air is leaking in and you're losing energy. Sealing your home will also make you more comfortable.
- ✚ Replace light bulbs with Compact Fluorescent or LED Bulbs.

## Energy Makeover

## How does the Campaign Work?

- ✦ Have an “Energy Audit” performed by Energy Answers. MED has contracted with Energy Answers, a local firm that is Building Performance Institute (BPI) certified, to provide energy audits at a discounted rate to MED customers.
- ✦ Audits performed by Energy Answers will focus on non-air conditioning energy saving projects.
- ✦ Energy Answers will provide a report to the customer detailing the estimated energy savings of recommended improvements and an estimated cost for each improvement.
- ✦ The audit will cost MED customers \$50.00 and is paid to Energy Answers prior to having the audit performed. If the customer makes **all Tier I** recommended improvements this cost will be reimbursed to them by means of a credit on their electric bill.
- ✦ Customers filing a credit application are required to have a follow up inspection performed by Energy Answers prior to filing for the credit.

## What is a Tier I Improvement?

- ✦ Any improvement where the estimated Energy Savings is 80% or greater than the material cost.

## How will customers be reimbursed?

- ✦ **As a credit on the customer’s electric bill, MED will reimburse the customer the lesser of:**
  - 100% of projected electrical savings over 5 years per improvement or
  - cost of materials required per improvement

The maximum credit for all improvements will be \$5,000.00 per household.

The campaign covers approved improvements made by December 31, 2019.

## Why Energy Efficiency?

- ✦ MED has a general responsibility to our customers to lead them toward reducing our dependence on outside fuel sources.
- ✦ MED has a contractual obligation with the New York Power Authority to provide energy efficiency and conservation projects.

## How to get started:

Any MED customer can call Jeff Loomis @ 315-750-0226 to schedule an appointment.

## PROJECT TIMELINE

Contact Energy Answers for Audit 315-750-0226

Audit completed, Report sent to Customer & MED

Customer Contacts Energy Answers for follow up Inspection

Energy Answers Performs Follow Up Inspection, Customer Must Be Present

MED Reviews Credit Application & Follow Up Inspection Report For Approval

**Program End Date**

Set Date for Audit, Sign Waiver to Release Billing Data & Audit Report

Customer Chooses Projects to Implement & \*Completes Work

Customer Completes & Submits Energy Makeover Credit Application

Customer Receives Credit on Bill within 30 Days of Filing Application

**12/31/2019**
